

Zenia**HR**

INTERNAL SALES AND ONBOARDING MANUAL

The ZeniaHR Admin Panel, explained module by module

This guide walks through every screen of the ZeniaHR admin panel with a real screenshot, what it does, how it works, and how it connects to the rest of the system. It is written for new team members and sales people, so anyone can learn the product and demo it with confidence.

- 46 modules covered
- Real screenshots from demo data
- 5 roles: Super Admin, Company Head, HR, Finance, Employee
- Built for manpower and staffing companies

What is ZeniaHR?

ZeniaHR is a multi-company (multi-tenant) HRMS and payroll platform. One system runs many separate companies, each with its own branches, staff and data kept fully apart. It covers the whole journey: hire a person, mark attendance, run payroll with PF and ESIC, stay compliant, and, for staffing companies, deploy them at client sites and bill the client. It can be white-labelled to the customer own brand and domain.

How to use this guide

Read the Overview and How the modules connect first, so the big picture is clear. Then use the left menu to jump to any module. Each module page has the same shape: a screenshot, what it does in plain language, key features, how it works step by step, how it connects to other modules, and a sales tip. Use the search box to find a module fast.

The five roles

- Super Admin
- Company Head
- HR
- Finance

Runs the platform: all companies, plans and users.

Owns one company: sees the most modules within it.

Day-to-day people work: employees, attendance, leave.

Payroll, billing and compliance figures.

Employee

Self-service: attendance, payslips, requests.

One idea to remember: plan and role decide what you see

Two things shape the menu. The subscription plan unlocks premium modules (a locked module shows an Upgrade screen), and the role plus permission matrix decide what each person can open. That is why the same login can look different for two people.

How the modules connect

ZeniaHR is not a set of separate tools. The modules feed each other, so data is entered once and flows on. These are the four journeys to understand.

The core people-to-pay flow

Employees → Attendance → Payroll → Payslips and Bank Sheet → Finance and Compliance (PF, ESIC, PT)

The outsourcing revenue flow

Tender → Contract → Sites → Deployment → Attendance → Billing (client invoice with GST and TDS)

The communication flow

Employee events and Payroll → Communication Center → WhatsApp message to the employee

The control flow

Plan → Unlocked modules; Roles → Permission matrix → What each person sees; Actions → Audit Trail

The one sentence pitch

Win a tender, sign the contract, deploy staff at client sites, mark their attendance, pay them through payroll with PF and ESIC handled, then bill the client with correct GST and TDS: all in one connected system.

Table of contents

Click any entry to jump straight to that module. All 46 modules are listed, grouped as they appear in the panel.

👋 Getting started

Read this first. It explains what ZeniaHR is, who logs in, and how to move around.

01 Signing in ALL USERS

A secure, branded login with CAPTCHA and lockout protection.

Who uses it: Everyone

Every user reaches ZeniaHR through one secure sign-in page. The person types their work email and password, then the characters shown in the picture box (the CAPTCHA). ZeniaHR checks the password safely (it is never stored in plain text) and, after too many wrong tries, locks the account for a few minutes so nobody can guess their way in.

KEY FEATURES AND OPTIONS

- Email plus password, with a visual CAPTCHA that blocks bots.
- Automatic lockout after repeated failed attempts, with a countdown.
- Optional Google reCAPTCHA and one-time-password reset by email.
- The same page carries the customer logo and brand colour when white-label is on.

HOW IT WORKS

1. Open the company ZeniaHR web address.
2. Enter the work email and password.
3. Type the CAPTCHA characters and click Sign in.
4. Land on the workspace picker (if more than one branch) or straight on the dashboard.

HOW IT CONNECTS TO OTHER MODULES

- **Roles and permissions:** the login decides which modules the person can see next.
- **Company Profile and white-label:** the logo and colour on this page come from there.

SALES AND DEMO TIP

Selling point: security is built in from the first screen. CAPTCHA, lockout and encrypted passwords come as standard, not as a paid add-on.

Platform administration

The Super Admin side. This is how ZeniaHR itself is run across all customer companies. Most of your sales customers never see this, but you should understand it.

02 SaaS Admin **SUPER ADMIN**

The control tower for the whole platform.

Who uses it: Super Admin

```

A single command view for the platform owner. It brings together the health of every customer company, revenue and subscription signals, and quick links to run the business behind ZeniaHR.

KEY FEATURES AND OPTIONS

- Platform-wide totals at a glance.
- Fast links into Companies, Subscriptions and Users.
- Only the platform owner (Super Admin) can open it.

HOW IT WORKS

1. Sign in as Super Admin.
2. Open SaaS Admin from the dark sidebar.
3. Drill into any company or subscription from there.

HOW IT CONNECTS TO OTHER MODULES

- **Companies:** each tenant is managed there.
- **Subscription Management:** billing and plans live there.

03 Companies (tenants) **SUPER ADMIN**

Every customer company and its branches.

Who uses it: Super Admin

The screenshot displays the ZeniaHR Super Admin interface for the 'Companies' section. The left sidebar contains navigation links: Dashboard, Companies (selected), Subscription Management, Bank Verification Credits, SaaS Admin, User Management, Recruitment CRM, Security Center, and Template Management. The main content area is titled 'Companies' and features a 'SaaS Company Management' section with four summary cards: 'TOTAL COMPANIES' (1 Registered organizations), 'TOTAL BRANCHES' (5 All company branches), 'ACTIVE COMPANIES' (1 Currently Active Organizations), and 'ACTIVE BRANCHES' (5 Currently Active Branches). Below these cards is a search bar and filters for 'All Status' and 'All Plans'. A 'Tenant Directory' table lists 1 client registered, showing details for 'ZeniaHR Demo Enterprise (DEMO)' as a 'Parent Company' with contact information and status.

Company Profile	SaaS Admin Info	Details	Status	Actions
> ZeniaHR Demo Enterprise (DEMO) Parent Company	9825012345	Sector: Manufacturing Joined: 28 Aug 2026 Combined Staff: 77	Active	Overview >

ZeniaHR is multi-tenant, which means one installation serves many separate companies with their data kept fully apart. The Companies screen is the directory of those tenants. Each company can have several branches (for example a head office plus city branches), and the totals show how many companies and branches are active.

KEY FEATURES AND OPTIONS

- Tenant directory with sector, join date and combined staff count.
- Create Company, plus Overview, edit, assign users and archive for each.
- Parent company and branch structure, with active and archived states.
- Search and filter by status or plan.

HOW IT WORKS

1. Open Companies.
2. Use Create Company to onboard a new customer, or open Overview on an existing one.
3. Expand a company to see its branches and staff.

HOW IT CONNECTS TO OTHER MODULES

- **Subscription Management:** each company sits on a plan that unlocks modules.
- **Employees and Payroll:** all HR data is scoped to the company and branch selected here.

SALES AND DEMO TIP

This is the proof of true multi-company isolation, useful when selling to a group that runs several firms.

04 Subscription Management SUPER ADMIN

Plans, billing and renewals for every tenant.

Who uses it: Super Admin

The commercial engine. It tracks which plan each company is on, what they pay, when they renew, and the invoices raised for the subscription itself. This is separate from the customer billing their own clients.

KEY FEATURES AND OPTIONS

- Plan, price and renewal date per company.
- Subscription invoices and payment records.
- Upgrade and downgrade flows.

HOW IT WORKS

1. Open Subscription Management.
2. Pick a company to view its plan and billing history.
3. Change plan or record a payment.

HOW IT CONNECTS TO OTHER MODULES

- **Subscription Plans:** the plans defined there are assigned here.
- **Every module:** the plan decides which modules a company can open.

SALES AND DEMO TIP

Plan controls feature access, so an upsell is one click: move the company to a higher plan and premium modules unlock instantly.

05 Subscription Plans **SUPER ADMIN**

Define what each plan costs and unlocks.

Who uses it: Super Admin

The plan catalogue. Free, Starter, Professional, Enterprise and Custom. Each plan sets a price, employee and branch limits, storage, WhatsApp message allowance, and the exact list of premium modules it unlocks. Core HR, attendance and payroll are always included; premium modules (contracts, tenders, compliance, and so on) are switched on per plan.

KEY FEATURES AND OPTIONS

- Five plan tiers including a fully Custom plan.
- Per-plan limits: employees, branches, admin users, storage, WhatsApp messages, documents.
- Per-plan premium module list and report access.
- Prices shown per employee, quarterly and yearly.

HOW IT WORKS

1. Open Plans.
2. Edit a plan to change its price, limits or unlocked modules.
3. Save. New companies pick it up immediately.

HOW IT CONNECTS TO OTHER MODULES

- **Subscription Management:** plans are assigned to companies there.
- **Premium module gates:** a locked module shows an Upgrade screen tied to these plans.

SALES AND DEMO TIP

Great demo moment: show the same company before and after an upgrade and watch the locked modules light up.

06 Bank Verification Credits SUPER ADMIN

Prepaid credits for bank account and document checks.

Who uses it: Super Admin

The screenshot shows the 'Bank Verification Credits' management interface for a Super Admin. The left sidebar contains navigation links: Dashboard, Companies, Subscription Management, Bank Verification Credits (active), SaaS Admin, User Management, Recruitment CRM, Security Center, and Template Management (Beta). The main content area is titled 'Bank Verification Credit Management' and includes a 'SUPER ADMIN' badge, a 'Refresh' button, and an 'Add Verification Credits' button. Below this is a summary section with four cards: 'TOTAL COMPANIES' (1, 0 API / 1 Manual), 'CREDITS REMAINING' (8, 8 allocated), 'CREDITS USED TODAY' (0, Live usage), and 'API SUCCESS RATE' (100%, Verification requests). A navigation bar below the summary cards includes links for 'Company Credits (1)', 'Verification Credit Ledger', 'Verification Audit Logs', 'Verification Usage Reports', and 'Payments & Pricing'. A search bar is present with the text 'Search by company name or provider...'. Below the search bar is a table showing one company: 'ZeniaHR Demo Enterprise (DEMO) ID: #1'. The table columns are: COMPANY, PLAN / MODE (Enterprise, Mode: Manual), PROVIDER (Cashfree), TOTAL CREDITS ALLOCATED (8), CREDITS USED (0), CREDITS REMAINING (8), STATUS (Active), and ACTIONS (Add, Remove, Reset, Suspend).

Some checks, like confirming an employee bank account is real before paying salary, use a paid verification service. Those are bought as credits. This screen tops up and tracks the credit balance that companies draw down when they run a verification.

KEY FEATURES AND OPTIONS

- Credit balance and usage history.
- Top-up and allocation to companies.
- Low-credit warnings.

HOW IT WORKS

1. Open Bank Verification Credits.
2. Add credits or review consumption.
3. Companies then spend credits when verifying accounts.

HOW IT CONNECTS TO OTHER MODULES

- **Verification Credits (company view):** companies see and spend their own balance.

- **Payroll:** a verified bank account is the safe basis for salary payment.

07 User Management SUPER ADMIN

Platform users, roles and the permission matrix.

Who uses it: Super Admin

User Management & RBAC
Enterprise Role-Based Access Control & Global User Governance

Buttons: Add User, Import Users, Export, Audit Logs

Summary Cards:

- Total Users: 3 (All registered users)
- Active Users: 3 (92% Current active users)

Showing all 3 users

Rows per page: 10

Controls who can log in at the platform level and what each role may do. The permission matrix lists every module down one side and each role across the top, so access is granted or revoked with a single grid of switches. Because the matrix is generated from the one module registry, a new module appears here automatically.

KEY FEATURES AND OPTIONS

- Create and manage platform users.
- Role based access: Super Admin, Company Head, HR, Finance, Employee.
- A permission matrix covering every module.

HOW IT WORKS

1. Open User Management.
2. Add a user and set the role.
3. Fine tune module access in the matrix.

HOW IT CONNECTS TO OTHER MODULES

- **Every module:** visibility everywhere is driven by these permissions.
- **Audit Trail:** user actions are logged there.

08 Audit Trail **SUPER ADMIN**

A tamper-evident log of who did what.

Who uses it: Super Admin

ZeniaHR SUPER ADMIN

by Nilesch Gohil - Employee

A running record of sensitive actions across the platform: logins, changes to companies, permission edits and more. It is the accountability layer that enterprise buyers and auditors ask for.

KEY FEATURES AND OPTIONS

- Time-stamped action log.
- User, company and action detail.
- Filter and export for auditors.

HOW IT WORKS

1. Open Audit Trail.
2. Filter by user, company or date.
3. Export the evidence when asked.

HOW IT CONNECTS TO OTHER MODULES

- **User Management:** every permission change is captured here.
- **Security Center:** both support the security and compliance story.

SALES AND DEMO TIP

Enterprise and government tenders often require an audit log. Point to this screen directly.

Home

Where a company user lands after choosing a workspace.

09

Dashboard CORE

The daily snapshot for the selected branch.

Who uses it: Company Head, HR, Finance

The home screen for a company. It summarises the branch that is currently selected in the top workspace picker: how many employees, who is present today, leaves waiting for approval, the payroll value for the month, verification credits left, and quick tiles for tasks and tenders. It is the fastest way to see the state of the business each morning.

KEY FEATURES AND OPTIONS

- Live tiles: Total Employees, Present Today, Pending Leaves, Payroll This Month.
- Verification credit balance with a low-credit warning.
- Employee slots used against the plan limit.
- Task Manager and Tender snapshots, and a Remove Demo Data control for trials.
- Everything is scoped to the branch chosen in the workspace picker.

HOW IT WORKS

1. Sign in and choose a workspace (head office or a branch).
2. Read the tiles for that branch.
3. Click any tile to jump to the full module.

HOW IT CONNECTS TO OTHER MODULES

- **Employees, Attendance, Leave, Payroll:** every tile is a live read from those modules.
- **Workspace picker:** switching branch re-scopes the whole dashboard.

SALES AND DEMO TIP

Open the demo on the dashboard first. It tells the whole story in one screen before you dive into modules.

HR and people

The core people modules. This is where most day-to-day HR work happens.

10

Employees CORE

The master record for every person on the payroll.

Who uses it: Company Head, HR, Finance

SR NO	EMP CODE	EMPLOYEE FULL NAME	DATE OF JOINING	DESIGNATION	CATEGORY	ACTIONS
1	DEMO-1-0001	Aryan Das aryan.das.c1@demo.zeniahr.local	17 Nov 2025	Engineering Lead	Highly skilled

12	DEMO-1-0012	Vihaan Chopra	03 Nov 2024	Inside Sales Rep	Skilled	

The heart of the system. Every worker has one profile here holding personal details, job and designation, pay structure, statutory identifiers (PAN, Aadhaar, UAN, PF number, ESIC number) and bank details. Staff are grouped by status (Active, Previous, Temporary, Pending Approvals) and by skill category (Highly skilled, Skilled, Semi-skilled). Adding, editing, exiting and bulk-importing employees all start here.

KEY FEATURES AND OPTIONS

- Tabs for Active, Previous, Temporary, Pending Approvals and All Staff, each with a live count.
- Add Employee, bulk Excel import, and an Onboarding QR that lets a new joiner self-fill their details.
- Search and filter by department, status, code, name or designation.
- Per-row actions: view, edit and exit (offboard), plus optional biometric code column.
- An approval gate: new joiners stay inactive until an admin approves them.

HOW IT WORKS

1. Open Employees. The Active tab lists current staff.
2. Click Add Employee to create one, or share the Onboarding QR so the joiner fills their own form.
3. Approve pending joiners from the Pending Approvals tab.
4. Use the edit and exit actions to update or offboard a person.

HOW IT CONNECTS TO OTHER MODULES

- **Attendance:** every employee becomes a row to mark present or absent.
- **Payroll:** salary structure and statutory numbers here drive the payslip and PF or ESIC.
- **Employee Documents:** each person has a document folder linked to this profile.
- **Leave Management:** leave balances attach to the employee record.

SALES AND DEMO TIP

Start every add-employee demo with the Onboarding QR. Customers love that the worker enters their own data on a phone, which cuts HR typing.

11 Employee Cards BETA

Printable ID cards from the employee data you already hold.

Who uses it: Company Head, HR

The screenshot shows the 'Employee Cards' section of the ZeniaHR Demo Enterprise (DEMO) interface. The sidebar on the left contains navigation links: Dashboard, Employees, Employee Cards (highlighted), Attendance, Attendance API Integration, Leave Management, Recruitment CRM, Payroll, Billing, Billing 2, Finance & Compliance, Tender Management, Contract Management, Payroll Wallet, Verification Credits, Employee Documents, Task Manager, Reports, and Custom Report. The main content area is titled 'Employee Cards' and includes a summary of active employees (39 employees). It features filters for Branch (All branches), Department (All departments), and a search bar. Below the filters, a grid of employee cards is displayed, each showing the employee's photo, name, designation, CTC, and attendance status. The cards are arranged in two rows of four, with a search bar and filters at the top.

Branch	Department	Employee
All branches	All departments	Search by name, employee ID or designation...

Showing 20 of 39 employees

DEMO-1-0007	Krishna Mehta	Sales Sales Manager	₹11,34,000 / yr		
DEMO-1-0008	Kiaan Shetty	Sales Sales Executive	₹5,82,000 / yr		

Turns employee profiles into professional identity cards ready to print, using the photo, name, designation, code and company branding already in the system. No re-typing.

KEY FEATURES AND OPTIONS

- Card layouts driven by employee data.
- Company logo and colours.
- Batch view for printing.

HOW IT WORKS

1. Open Employee Cards.
2. Pick employees.
3. Preview and print or export.

HOW IT CONNECTS TO OTHER MODULES

- **Employees:** all card data comes from the profile.
- **Company Profile:** branding on the card comes from there.

SALES AND DEMO TIP

Marked Beta today, so set expectations: the layout is still being polished.

12 Attendance CORE

The daily record that feeds payroll.

Who uses it: Company Head, HR, Finance, Employee

The Attendance Management Center records who is present, absent, on leave, working from home, half day or late, and tracks overtime and shifts. It states plainly that it is fully integrated with the payroll engine, leave balances and overtime, and it can push the approved month straight into payroll. Attendance can be entered by hand, imported from Excel, or pulled from biometric devices through the API.

KEY FEATURES AND OPTIONS

- Tabs: Dashboard, Attendance Entry, Overtime, Shift Management, Excel Import, Reports, Settings.
- Live counters for Present, Absent, On Leave, WFH, Half Day, Late and Overtime.
- Workforce analytics and department distribution charts.
- A Push to Payroll Engine action that hands the month to payroll.
- A broadcast box to message the branch (an entry point for WhatsApp and notifications).

HOW IT WORKS

1. Open Attendance and pick the month.
2. Mark attendance by hand, import an Excel sheet, or let biometric devices feed it in.
3. Review overtime and approvals.
4. Click Push to Payroll Engine to move the approved month into payroll.

HOW IT CONNECTS TO OTHER MODULES

- **Payroll:** present days and overtime become payable days on the payslip.
- **Leave Management:** approved leave shows here so it is not double counted.
- **Attendance API Integration:** biometric and third-party devices sync in through it.
- **Contract Management:** site deployment and attendance are the basis for client billing.

SALES AND DEMO TIP

The one line that sells it: attendance is not a silo. Show the Push to Payroll Engine button and explain the day you mark here is the day that gets paid.

13 Attendance API Integration BETA

Connect biometric machines and third-party attendance.

Who uses it: Super Admin, Company Head, HR

A bridge for pulling attendance from outside sources: biometric or face machines, or another attendance app, through a documented API. It removes manual entry for companies that already have devices at the gate.

KEY FEATURES AND OPTIONS

- API keys and endpoints for device vendors.
- Mapping of device users to ZeniaHR employees.
- Sync status and logs.

HOW IT WORKS

1. Open Attendance API Integration.
2. Generate an API key and share it with the device vendor.
3. Map device IDs to employees and watch punches flow in.

HOW IT CONNECTS TO OTHER MODULES

- **Attendance:** device punches land as attendance rows.
- **Integration Hub:** part of the wider connectivity story.

SALES AND DEMO TIP

Beta today. Good for a roadmap conversation with device-heavy customers like factories and security agencies.

14 Leave Management CORE

Leave types, balances, requests and approvals.

Who uses it: Company Head, HR

ZeniaHR Demo Enterprise (DEMO)
Company Head

Leave Management
Dashboard > Requests > Administration > Balances > History > Reports > Policies

39 employees in workspace

Summary:

- 221 Total Requests
- 9 Pending Approvals
- 205 Approved
- 39 Employees

Pending Approvals (9)

Name	Request Type	Period	Status
Kiaan Bose	PL	10 Sep 2026 - 11 Sep 2026	Pending
Krishna Mehta	PL	12 Sep 2026 - 13 Sep 2026	Pending
Reyansh Pillai	PL	06 Sep 2026 - 07 Sep 2026	Pending
Sai Pillai	PL	08 Sep 2026 - 09 Sep 2026	Pending
Vihaan Rao	PL	09 Sep 2026 - 10 Sep 2026	Pending
Riya Kulkarni	PL	10 Sep 2026 - 11 Sep 2026	Pending

Recent Requests

Name	Request Type	Period	Status
Kiaan Bose	PL	10 Sep 2026 - 11 Sep 2026	Pending
Krishna Mehta	PL	12 Sep 2026 - 13 Sep 2026	Pending
Vihaan Chopra	CL	28 Aug 2026 - 28 Aug 2026	Approved
Rohan Rao	CL	28 Aug 2026 - 28 Aug 2026	Approved
Reyansh Pillai	PL	06 Sep 2026 - 07 Sep 2026	Pending
Sai Pillai	PL	08 Sep 2026 - 09 Sep 2026	Pending

Runs the full leave cycle. It defines leave types and balances, receives requests from employees, routes them for approval, and updates balances automatically once approved. Approved leave then shows in attendance so a person is never marked absent for an approved day.

KEY FEATURES AND OPTIONS

- Configurable leave types and opening balances.
- Request, approve and reject flow.
- Live balances per employee.
- Calendar and reports.

HOW IT WORKS

1. Open Leave Management.
2. Set up leave types and balances.
3. Approve or reject incoming requests.
4. Balances and attendance update on their own.

HOW IT CONNECTS TO OTHER MODULES

- **Attendance:** approved leave is reflected there automatically.
- **Payroll:** unpaid leave reduces payable days.
- **Employees:** balances live on the employee record.

SALES AND DEMO TIP

Emphasise that leave, attendance and payroll agree with each other without anyone re-keying data.

15

Recruitment CRM CORE

A hiring pipeline from applicant to joiner.

Who uses it: Super Admin, Company Head, HR

A light applicant tracker. It holds openings and candidates, moves them through hiring stages, and hands a selected candidate over to onboarding so they become an employee without re-entering details.

KEY FEATURES AND OPTIONS

- Job openings and candidate records.
- Stage-based pipeline (applied, interview, offer, hired).
- Notes and status per candidate.

HOW IT WORKS

1. Open Recruitment CRM.
2. Add an opening and candidates.
3. Move candidates through stages.
4. Convert a hire into an employee.

HOW IT CONNECTS TO OTHER MODULES

- **Employees:** a hired candidate flows into onboarding as an employee.

- **Communication Center:** candidate messages can be templated.

SALES AND DEMO TIP

Positions ZeniaHR as more than payroll: it also helps fill the seats.

Payroll, billing and finance

Where days worked become salaries paid, statutory returns and client invoices. This is the strongest part of the product for manpower and staffing companies.

16 Payroll CORE

A guided, six-step monthly payroll run.

Who uses it: Company Head, HR, Finance, Employee

Enterprise Payroll Management

Secure payroll workflow for Ahmedabad Head Office with verification, payment confirmation, and payslip distribution.

EMPLOYEES: 39 | GENERATED: 0 | APPROVED: 0 | PAID: 0 | PENDING: 39 | PAYROLL AMOUNT: ₹0

☐	2	DEMO0006	Tushar Gohil	Ahmedabad Head Office	Sales	—	—	—	—	—	—	—	—	—	—	N G	
☐	3	DEMO0011	Hetal Dave	Ahmedabad Head Office	Admin	—	—	—	—	—	—	—	—	—	—	N G	
☐	4	DEMO0016	Nisha Desai	Ahmedabad Head Office	HR	—	—	—	—	—	—	—	—	—	—	N G	

The Enterprise Payroll Management screen turns attendance into paid salaries with a clear six-step workflow, so nothing is missed. It computes gross pay, then the statutory deductions Provident Fund (PF), Employees State Insurance (ESIC) and Professional Tax (PT), then net pay, and produces payslips and a bank payment sheet. The rule is simple and always holds: net salary equals basic plus allowances plus bonus minus deductions.

KEY FEATURES AND OPTIONS

- Six steps in order: Synchronize Attendance, Generate Payroll, Approve Payroll, Generate Salary Slips, Salary Payment, Lock Month.
- Monthly counters: employees, generated, approved, paid, pending and payroll amount.
- Automatic PF, ESIC and Professional Tax based on the company statutory rates.
- A per-employee grid with monthly, daily, gross and net salary, overtime, bonus and deductions.
- Download all payslips as a ZIP, email all slips, and a bank sheet for the salary transfer.

HOW IT WORKS

1. Step 1 Synchronize Attendance: pull the approved month from Attendance so payable days are correct.
2. Step 2 Generate Payroll: the engine computes gross, PF, ESIC, PT and net for every employee.
3. Step 3 Approve Payroll: a reviewer signs off the figures.
4. Step 4 Generate Salary Slips: payslips are produced for each employee.
5. Step 5 Salary Payment: download the bank sheet and mark salaries paid.
6. Step 6 Lock Month: freeze the month so figures cannot drift.

HOW IT CONNECTS TO OTHER MODULES

- **Attendance:** payable days and overtime come straight from there.
- **Finance and Compliance:** PF and ESIC totals feed the statutory ECR and returns.
- **Employee Documents:** payslips can be filed to each person folder.
- **Communication Center:** a Salary Credited or Payslip Available message can be sent automatically.

SALES AND DEMO TIP

The six-step workflow is the demo. Walk it left to right. Buyers relax when they see payroll as a checklist, not a black box. Then say the PF and ESIC are worked out for you.

17

Payroll Wallet CORE

Fund and track the money used to pay salaries.

Who uses it: Company Head, HR, Finance

A wallet that holds and tracks the funds set aside for salary payments, so a company can see money in, money paid out and the balance available for the next run. It supports the salary payment step of payroll.

KEY FEATURES AND OPTIONS

- Wallet balance and transaction history.
- Top-up and payout records.
- Ties to the payroll payment step.

HOW IT WORKS

1. Open Payroll Wallet.
2. Review balance and movements.
3. Fund it before the salary run.

HOW IT CONNECTS TO OTHER MODULES

- **Payroll:** it backs the Salary Payment step.

18

Billing (Invoicing) CORE

Raise GST invoices to the companies you serve. Opens in its own tab.

Who uses it: Company Head, Finance, HR

ZeniaHR Demo Enterprise (DEMO)
Company Head

Billing

Invoice Management
Generate GST invoices, track payments & outstanding, manage customers and billable items — ZeniaHR Demo Enterprise (DEMO).

Work in Progress
Invoice Management is under active development. Advanced invoice templates, branding, recurring invoices, payment gateway integrations, PDF enhancements, and automation are still being completed. Current invoice generation remains safe to use.

Invoice ID	Customer	Amount	Status
INV-2026-27-0009	Reliance Facility Services Pvt Ltd	₹37,03,297.00	Draft
INV-2026-27-0006	TDS Test Client (Govt)	₹11,800.00	Paid
INV-2026-27-0005	Reliance Facility Services Pvt Ltd	₹9,16,860.00	Draft
INV-2026-27-0004	Torrent Power Ltd	₹4,46,040.00	Generated
INV-2026-27-0003	Zydus Hospital Ltd	₹6,90,300.00	Generated

For a manpower or staffing company, this is how you bill your clients. It creates GST tax invoices in a Zoho-Books style, with customer masters, HSN and SAC codes, service charge, and the correct CGST, SGST or IGST split. It also handles the deductions clients make at payment, the two percent GST TDS and two percent income-tax TDS, which apply to the taxable value, never to the GST. It opens in its own browser tab so it can sit alongside the main app, the way Zoho Books does.

KEY FEATURES AND OPTIONS

- GST tax invoices with HSN or SAC, service charge and rounding.
- CGST plus SGST for local, or IGST for inter-state, chosen automatically.
- Customer masters that pre-fill GSTIN, PO number and supervisor.
- Invoice number series per financial year with prefixes, and a manual override.
- Collection view that records TDS and other deductions at payment.

HOW IT WORKS

1. Open Billing (it launches in a new tab).
2. Pick the client, which fills their GST and PO details.
3. Add manpower lines, service charge and GST.
4. Send the invoice and later record the payment with TDS deducted.

HOW IT CONNECTS TO OTHER MODULES

- **Contract Management:** the contract rate and site deployment justify the invoice amount.
- **Payroll:** wages paid to staff are the cost behind what you bill the client.
- **Finance and Compliance:** GST and TDS figures roll up for reporting.

SALES AND DEMO TIP

For staffing customers this is often the deciding module. Show the TDS handled correctly on the basic value, not the GST. Accountants notice.

19

Billing 2 (Billing Console) CORE

The newer manpower billing run and receivables console. Opens in its own tab.

Who uses it: Company Head, Finance, HR

A newer billing workspace built for manpower outsourcing. It runs billing from attendance, tracks receivables with ageing, records collections with TDS and named deductions, and keeps the customer and item masters. It sits on the same Billing permission as the invoicing module.

KEY FEATURES AND OPTIONS

- Billing run generated from attendance.
- Receivables with ageing buckets.
- Collections with TDS and custom deductions.
- Customer and item masters.

HOW IT WORKS

1. Open Billing 2 (new tab).
2. Run billing for the month from attendance.
3. Track outstanding and record collections.

HOW IT CONNECTS TO OTHER MODULES

- **Attendance:** billing is generated from attendance days.
- **Billing (Invoicing):** both share the billing permission and customer data.

SALES AND DEMO TIP

Two billing surfaces exist today. Lead with the one that matches the customer maturity: simple invoicing, or the attendance-driven console.

20 Finance and Compliance BETA

The statutory home for PF, ESIC, PT and returns.

Who uses it: Company Head, HR, Finance

ZeniaHR Demo Enterprise (DEMO)
Company Head

Finance & Compliance
Employee loans & advances, statutory filing calendar and payroll-driven deductions — one place — Ahmedabad Head Office.

Work in Progress
Finance & Compliance is under active development. Loan management, statutory compliance, payroll deductions, filing automation, reports, and government integrations are still being expanded. Existing functionality remains safe to use.

Recent EMI Deductions		Recent Compliance Actions	
₹		EPF ECR & Payment	15 Jul 2026

Brings the statutory side of payroll together: Provident Fund and ESIC challans and returns (including the PF ECR, the Electronic Challan cum Return), Professional Tax, and related compliance outputs. It also gathers Employee Loans in one place. The numbers come from payroll, so the returns match what was paid.

KEY FEATURES AND OPTIONS

- PF ECR and ESIC return figures derived from payroll.
- Professional Tax and other statutory outputs.
- Employee loan tracking folded in.
- Export for filing in the government portals.

HOW IT WORKS

1. Run payroll for the month.
2. Open Finance and Compliance.
3. Review PF, ESIC and PT figures.
4. Export the ECR and returns for filing.

HOW IT CONNECTS TO OTHER MODULES

- **Payroll:** every statutory figure comes from the payroll run.
- **Employee Loan Management:** loans and recoveries live under this umbrella.

SALES AND DEMO TIP

The phrase to use: ZeniaHR gives you the PF ECR and ESIC numbers ready to file. Filing still happens on the government portal, ZeniaHR does the maths.

21 Compliance Management CORE

Statutory registers and compliance reports.

Who uses it: Company Head, HR, Finance

ZeniaHR Demo Enterprise (DEMO)
Company Head

Compliance Management
Statutory filing calendar, due-date tracking & challans — PF · ESI · PT · TDS · GST · LWF — Ahmedabad Head Office.

Work in Progress
Compliance Management is under active development. The statutory filing calendar (PF/ESI/PT/TDS/GST/LWF), due-date tracking, status, challan upload and payroll-derived amounts are live; auto-reminders, government e-filing integrations and the full statutory report suite are still being expanded (detailed challans are in the Reports module).

PT	Jun 2026	₹9,400	52d overdue

The reporting face of compliance: the registers and statutory reports a labour or PF or ESIC inspector may ask for, generated from the same payroll and attendance data so they are always consistent.

KEY FEATURES AND OPTIONS

- Statutory registers and reports.
- Consistent with payroll and attendance.
- Export ready.

HOW IT WORKS

1. Open Compliance Management.
2. Pick the report or register and period.
3. Export.

HOW IT CONNECTS TO OTHER MODULES

- **Payroll and Attendance:** the source of every compliance figure.

- **Finance and Compliance:** the two together cover statutory needs.

22 Employee Loan Management CORE

Advances and loans with automatic salary recovery.

Who uses it: Company Head, HR, Finance

Employee Loan Management
Loans & advances, EMI schedules, approvals and automatic payroll deduction — Ahmedabad Head Office.

Work in Progress
Employee Loan Management is under active development. Loan requests, approvals, the EMI schedule and automatic payroll deduction are live; reports export, employee self-service portal and multi-channel (SMS/WhatsApp/email) delivery are still being expanded.

PRIMARY KPIS

Recent EMI Deductions
No EMI deducted this month.

Records loans and advances given to employees and recovers them in instalments straight from payroll, so the balance reduces every month without manual tracking.

KEY FEATURES AND OPTIONS

- Loan and advance records per employee.
- Instalment schedule.
- Automatic recovery through payroll deductions.

HOW IT WORKS

1. Open Employee Loan Management (under Finance and Compliance).
2. Create a loan with an instalment plan.
3. Payroll deducts each instalment until cleared.

HOW IT CONNECTS TO OTHER MODULES

- **Payroll:** instalments are recovered as a salary deduction.
- **Salary Advances:** short advances follow the same idea.

23 Verification Credits CORE

The company balance for bank and document checks.

Who uses it: Company Head, HR, Finance

The company-side view of the prepaid credits used to verify employee bank accounts and documents before trusting them for payment. It shows the balance, warns when it is low, and records each check.

KEY FEATURES AND OPTIONS

- Live credit balance with low-credit alert.
- Per-check usage history.
- Top-up request.

HOW IT WORKS

1. Open Verification Credits.
2. Check the balance.
3. Verify a bank account when adding an employee.

HOW IT CONNECTS TO OTHER MODULES

- **Employees:** bank details are verified as people are added.
- **Payroll:** a verified account is the safe basis for payment.

SALES AND DEMO TIP

A small trust feature with a big message: salaries go to verified accounts, which reduces fraud.

24

Tender Management CORE

Track the tenders you bid for.

Who uses it: Company Head

For companies that win work through tenders (common for manpower, housekeeping and security firms), this keeps the tenders you are pursuing: value, deadline and status, so nothing is missed. A won tender naturally becomes a contract.

KEY FEATURES AND OPTIONS

- Tender records with value and deadline.
- Status pipeline.
- Live tender snapshot on the dashboard.

HOW IT WORKS

1. Open Tender Management.
2. Add a tender you are bidding for.
3. Track it to won or lost.

HOW IT CONNECTS TO OTHER MODULES

- **Contract Management:** a won tender becomes a contract and sites.
- **Dashboard:** live tenders show as a home tile.

SALES AND DEMO TIP

Only the Company Head sees tenders and contracts. They are governance modules, which is a nice control story.

25 Contract Management CORE

The full life of a client contract, from award to renewal.

Who uses it: Company Head

This is the backbone for outsourcing companies. It follows a contract along its real life: Contract, Sites, Deployment, Attendance, Payroll, then Renewal or closure. You record the contract and its value, the sites it covers, the manpower deployed at each site, and from there attendance and billing follow. Tabs cover the Dashboard, Contracts, Sites, Deployment and Renewals, with counters for active, expiring, expired and closed contracts and total contract value.

KEY FEATURES AND OPTIONS

- Execution lifecycle: Contract, Sites, Deploy, Attendance, Payroll, Renew or Close.
- Tabs: Dashboard, Contracts, Sites, Deployment, Renewals.
- Counters: active, expiring, expired, closed, total contract value, active sites.
- Renewal tracking so contracts do not lapse silently.

HOW IT WORKS

1. Open Contract Management.
2. Create a contract and add its sites.
3. Deploy manpower to each site.
4. Attendance at the site drives payroll and client billing.
5. Track renewals before they expire.

HOW IT CONNECTS TO OTHER MODULES

- **Attendance:** site deployment is attended and that attendance is billed.
- **Payroll:** deployed staff are paid through payroll.
- **Billing:** the contract rate and attended days justify the client invoice.
- **Tender Management:** a won tender becomes a contract here.

SALES AND DEMO TIP

For a staffing or facility company this ties the whole product together: win a tender, sign a contract, deploy at sites, mark attendance, pay staff, bill the client. Walk that sentence while pointing at the lifecycle bar.

Operations and documents

The supporting modules that keep an office running: documents, vendors, assets, visitors, facilities and tasks.

26 Employee Documents CORE

A document folder for every employee.

Who uses it: Company Head, HR, Finance

A central store for each employee paperwork: ID proofs, contracts, certificates and payslips, kept against the person profile with expiry tracking so nothing lapses unnoticed.

KEY FEATURES AND OPTIONS

- Per-employee document folders.
- Upload, categorise and track expiry.
- Linked to the employee profile.

HOW IT WORKS

1. Open Employee Documents.
2. Pick an employee and upload their files.
3. Set categories and expiry dates.

HOW IT CONNECTS TO OTHER MODULES

- **Employees:** documents attach to each profile.
- **Document Vault:** company-level documents live in the vault.

SALES AND DEMO TIP

Pairs with the Onboarding QR: the worker can upload their own documents during self-onboarding.

27 Document Vault BETA

A secure store for company-level documents.

Who uses it: Company Head, HR

A protected store for the company own important documents, licences, registrations, agreements and policies, separate from individual employee folders, with controlled access.

KEY FEATURES AND OPTIONS

- Company document store.
- Access control.
- Categories and search.

HOW IT WORKS

1. Open Document Vault.
2. Upload company documents.
3. Organise and control who can see them.

HOW IT CONNECTS TO OTHER MODULES

- **Employee Documents:** people files sit separately, this is company level.
- **Company Profile:** company registration details link here.

SALES AND DEMO TIP

Beta today.

28 Vendor Management CORE

Keep your suppliers and subcontractors in order.

Who uses it: Company Head, HR

A directory of vendors and subcontractors with their details and documents, useful when parts of a contract are subcontracted or when regular suppliers are paid.

KEY FEATURES AND OPTIONS

- Vendor directory with contacts and documents.
- Status tracking.
- Search and filter.

HOW IT WORKS

1. Open Vendor Management.
2. Add vendors and their documents.
3. Reference them where needed.

HOW IT CONNECTS TO OTHER MODULES

- **Billing and finance:** vendor costs sit against contracts.

Track what the company owns and who holds it.

Who uses it: Company Head, HR

A register of company assets, laptops, phones, uniforms, equipment, with allocation to employees, so you always know what is issued to whom and what is due back at exit.

KEY FEATURES AND OPTIONS

- Asset register with categories.
- Allocation to employees.
- Return and condition tracking.

HOW IT WORKS

1. Open Asset Management.
2. Add assets.
3. Assign to employees and record returns.

HOW IT CONNECTS TO OTHER MODULES

- **Employees:** assets are issued to and recovered from people.

SALES AND DEMO TIP

At exit, unreturned assets are visible, a neat offboarding control.

30 Visitor Management CORE

Log and badge visitors to your premises.

Who uses it: Company Head, HR

Records visitors at reception: who came, who they met, in and out times, so the premises have a clean visitor trail for security and audits.

KEY FEATURES AND OPTIONS

- Visitor check-in and check-out.
- Host and purpose capture.
- Visitor log and reports.

HOW IT WORKS

1. Open Visitor Management.
2. Check a visitor in.
3. Check them out on the way.

HOW IT CONNECTS TO OTHER MODULES

- **Security Center:** both support premises security.

31 Facility Booking CORE

Book meeting rooms and shared resources.

Who uses it: Company Head, HR, Employee

Lets staff book shared facilities such as meeting rooms or vehicles, and shows availability so there are no clashes.

KEY FEATURES AND OPTIONS

- Bookable facilities.
- Availability calendar.
- Employee self-booking.

HOW IT WORKS

1. Open Facility Booking.
2. Pick a facility and slot.
3. Confirm the booking.

HOW IT CONNECTS TO OTHER MODULES

- **Employees:** employees make and hold bookings.

32 Task Manager CORE

Assign and track work across the team.

Who uses it: Everyone

A simple task board to assign work, set due dates and track it to done, with a snapshot of total, in progress, done and overdue on the dashboard.

KEY FEATURES AND OPTIONS

- Create and assign tasks.
- Status: total, in progress, done, overdue.
- Dashboard snapshot.

HOW IT WORKS

1. Open Task Manager.
2. Create a task and assign it.
3. Track it to completion.

HOW IT CONNECTS TO OTHER MODULES

- **Dashboard:** the task snapshot shows on home.

Reports, automation and security

The tools that turn data into reports, automate routine work, connect other systems and keep everything secure.

33

Reports CORE

Ready-made reports across HR, attendance and payroll.

Who uses it: Company Head, HR

A library of standard reports covering employees, attendance, leave, payroll and compliance, ready to view and export, so the common questions are answered without building anything.

KEY FEATURES AND OPTIONS

- Standard report catalogue.
- Filters by period, branch and department.
- Export to Excel or PDF.

HOW IT WORKS

1. Open Reports.
2. Pick a report and set filters.
3. View and export.

HOW IT CONNECTS TO OTHER MODULES

- **All modules:** reports read from every part of the system.
- **Custom Report Builder:** for questions the standard reports do not cover.

34 Custom Report Builder BETA

Build your own report when the standard ones fall short.

Who uses it: Company Head, HR, Finance

A drag-and-choose report builder: pick the fields, filters and grouping you want and save the report to run again later. Sensitive pay fields like PF and ESI are hidden from roles that should not see them.

KEY FEATURES AND OPTIONS

- Choose fields, filters and grouping.
- Save and re-run custom reports.
- Role-aware masking of sensitive columns.

HOW IT WORKS

1. Open Custom Report Builder.
2. Choose fields and filters.
3. Save and export the report.

HOW IT CONNECTS TO OTHER MODULES

- **Reports:** sits alongside the standard catalogue.
- **Permissions:** controls who can see pay data.

SALES AND DEMO TIP

Beta today. Good for a power-user or finance buyer who always wants a bespoke cut.

Automate approvals and routine steps.

Who uses it: Company Head, HR

Lets a company set rules that move work along on their own: routing approvals, triggering the next step, or nudging an owner, so routine processes do not stall.

KEY FEATURES AND OPTIONS

- Rule-based approvals and routing.
- Triggers and actions.
- Reusable across modules.

HOW IT WORKS

1. Open Workflow Automation.
2. Define a rule with a trigger and action.
3. Turn it on.

HOW IT CONNECTS TO OTHER MODULES

- **Leave, Payroll, Tasks:** approvals in those modules can be automated.
- **Communication Center:** a step can send a message.

SALES AND DEMO TIP

Beta today. Sell the direction: less manual chasing over time.

36 Integration Hub BETA

Connect ZeniaHR to the other systems you use.

Who uses it: Company Head

The place to connect outside systems: accounting tools, biometric devices, messaging and more, so data flows in and out rather than being re-typed.

KEY FEATURES AND OPTIONS

- Connectors to third-party systems.
- Keys and configuration.
- Status of each connection.

HOW IT WORKS

1. Open Integration Hub.
2. Choose a connector and configure it.
3. Verify the connection.

HOW IT CONNECTS TO OTHER MODULES

- **Attendance API Integration:** devices connect through the same story.
- **Billing:** accounting exports plug in here.

SALES AND DEMO TIP

Beta today. Use it to answer the does-it-integrate question with a yes and a roadmap.

37 Template Management BETA

Manage the templates used across the app.

Who uses it: Super Admin, Company Head

A central store for the document and message templates the system uses (for example letters and invoice or communication templates), so branding and wording stay consistent.

KEY FEATURES AND OPTIONS

- Central template library.
- Edit and version templates.
- Consistent branding.

HOW IT WORKS

1. Open Template Management.
2. Edit a template.
3. Save for everyone to use.

HOW IT CONNECTS TO OTHER MODULES

- **Communication Center:** message templates are used there.
- **Billing:** invoice templates apply there.

SALES AND DEMO TIP

Beta today.

38

AI Assistant CORE

Ask questions in plain language.

Who uses it: Company Head, HR, Employee

A helper that answers questions about the system and the company data in plain language, so users can find an answer without hunting through menus.

KEY FEATURES AND OPTIONS

- Natural-language questions.
- Answers grounded in the company data.
- Quick help across modules.

HOW IT WORKS

1. Open AI Assistant.
2. Type a question.
3. Read the answer or follow the link it gives.

HOW IT CONNECTS TO OTHER MODULES

- **All modules:** it can point to the right screen.

SALES AND DEMO TIP

A modern touch that demos well. Keep questions simple in a live demo.

39 Security Center

CORE

Security settings in one place.

Who uses it: Super Admin, Company Head

Central security controls: the CAPTCHA and lockout policy, session rules and related protections that guard sign-in and sensitive actions.

KEY FEATURES AND OPTIONS

- CAPTCHA and lockout policy.
- Session and access rules.
- Security posture in one view.

HOW IT WORKS

1. Open Security Center.
2. Set the CAPTCHA and lockout policy.
3. Save.

HOW IT CONNECTS TO OTHER MODULES

- **Signing in:** the login enforces these settings.
- **Audit Trail:** security events are logged.

SALES AND DEMO TIP

Point here whenever a buyer asks about security. It shows the controls are real and adjustable.

Learning and communication

Training, knowledge and the channels that reach employees, including WhatsApp.

40 **Communication Center** BETA

Reach employees over WhatsApp, driven by events and templates.

Who uses it: Company Head, HR

ZeniaHR Demo Enterprise (DEMO)
Company Head

Communication Center
Central hub for employee notifications, greetings & announcements - WhatsApp delivery, automation & live diagnostics

Work in Progress
The Communication Center is under active development. Some features may be incomplete or change during development. Existing stable functionality is safe to use.

Communication Health All configured

CONFIGURED TEMPLATES	MISSING TEMPLATES	AUTOMATION ENABLED	AUTOMATION DISABLED

Upcoming Work Anniversaries	Festival Templates	Announcements	Upcoming Holidays

0
Draft Messages

The hub for employee messaging: templates, campaigns, automation rules and a delivery log, with WhatsApp delivery through the official Meta Cloud API. It knows upcoming events, birthdays, work anniversaries, holidays, and can send a matching greeting on its own. It also carries operational templates like Salary Credited and Payslip Available. Email and SMS are planned; WhatsApp is the live channel today.

KEY FEATURES AND OPTIONS

- Tabs: Dashboard, Templates, Campaigns, Automation, Delivery and Logs, WhatsApp, Settings.
- Event to template automation for birthdays, anniversaries, holidays and payroll events.
- WhatsApp via the Meta Cloud API, with template management, a queue, a scheduler and health checks.
- Communication health view: configured templates, automation enabled, upcoming events covered.
- WhatsApp and Email show as Not Connected until the company adds its keys.

HOW IT WORKS

1. Open Communication Center.
2. Connect WhatsApp in Settings (add the Meta Cloud API details).
3. Pick or design a template and map it to an event.
4. Turn on automation and watch greetings and alerts send themselves.

HOW IT CONNECTS TO OTHER MODULES

- **Employees:** birthdays, anniversaries and contact numbers come from profiles.
- **Payroll:** a Salary Credited or Payslip Available message can fire after a run.
- **Workflow Automation:** a workflow step can trigger a message.

SALES AND DEMO TIP

Beta today, so be honest about status, but the automation and WhatsApp story is a strong differentiator. Show the event to template mapping. Remind the customer WhatsApp needs their own Meta number to go live.

41 Internal Communication CORE

An internal feed for announcements and updates.

Who uses it: Company Head, HR, Employee

A company noticeboard and feed where announcements, policies and updates reach everyone in one place, so information does not get lost in scattered chats.

KEY FEATURES AND OPTIONS

- Announcements and posts.
- Company-wide reach.
- Simple and familiar feed.

HOW IT WORKS

1. Open Internal Communication.
2. Post an announcement.
3. Employees see it in their feed.

HOW IT CONNECTS TO OTHER MODULES

- **Communication Center:** outbound messaging complements the internal feed.

42 Learning Management BETA

Courses and training for staff.

Who uses it: Company Head, HR, Employee

A light learning system to share training material and courses with employees and track who has completed them, useful for induction and compliance training.

KEY FEATURES AND OPTIONS

- Courses and content.
- Assign to employees.
- Completion tracking.

HOW IT WORKS

1. Open Learning Management.
2. Add a course.
3. Assign and track completion.

HOW IT CONNECTS TO OTHER MODULES

- **Employees:** training is assigned to people.
- **Knowledge Base:** reference material sits alongside courses.

SALES AND DEMO TIP

Beta today.

43 Knowledge Base CORE

A self-service library of help articles.

Who uses it: Company Head, HR, Employee

An internal help library where the company keeps how-to articles and policies so employees can find answers themselves. This is the same idea as the public help site this guide will feed into.

KEY FEATURES AND OPTIONS

- Categorised help articles.
- Search.
- Self-service answers.

HOW IT WORKS

1. Open Knowledge Base.
2. Browse or search for an article.
3. Read the answer.

HOW IT CONNECTS TO OTHER MODULES

- **AI Assistant:** the assistant can surface these articles.
- **Learning Management:** reference material supports training.

SALES AND DEMO TIP

Meta point: the website articles we build from this guide can live in exactly this kind of knowledge base.

⚙️ Company and settings

Company identity, branding and the settings that shape how everything behaves.

+ Add Owner

Holds the company legal name, GSTIN and PAN, address, logo and branding, and the statutory rates (PF, ESIC, Professional Tax, basic percentage, overtime) that payroll uses. It also carries branches. These details print on payslips and invoices and appear on the login when white-label is on.

KEY FEATURES AND OPTIONS

- Legal identity: name, GSTIN, PAN, address.
- Logo, colours and signature for documents.
- Statutory rates that drive payroll.
- Branch list.

HOW IT WORKS

1. Open Company Profile.
2. Fill identity, branding and statutory rates.
3. Save. Payroll and documents use it at once.

HOW IT CONNECTS TO OTHER MODULES

- **Payroll:** the PF, ESIC and PT rates here drive deductions.
- **Billing:** GSTIN and address print on invoices.
- **Signing in:** branding shows on the login.

SALES AND DEMO TIP

Set this up first in any new deployment. Everything downstream, payslips, invoices, branding, reads from here.

45 Custom Domain (white-label) BETA

Run ZeniaHR on the customer own web address and brand.

Who uses it: Company Head

ZeniaHR Demo Enterprise (DEMO) Company Head

Custom Domain (Beta)

Access your workspace on your own domain — hr.yourcompany.com instead of app.zeniahr.com.

Custom Domain is currently in Beta. Some advanced branding features will be added in future updates.

How it works

1. Enter a subdomain you own, e.g. **hr.yourcompany.com**, employees.yourcompany.com or portal.yourcompany.com.
2. Create the DNS records we show you (a copy-paste CNAME).
3. Click Verify — we check DNS, issue the SSL certificate automatically, and activate the domain.
4. Your team logs in at your domain with your logo and colors. SSL is renewed automatically — you never handle certificates.

hr.yourcompany.com **+ Add Domain**

White Label ☐ Enable white-label branding

With white label enabled, your custom-domain login page shows your logo, name and colors — with no ZeniaHR branding.

Save White Label Settings

Lets a customer serve ZeniaHR from their own domain with their own logo and colours, so to their staff it looks like their own system. A strong differentiator for larger customers and for partners who resell.

KEY FEATURES AND OPTIONS

- Own domain and branding.
- Logo and colour theme.
- Branded login and documents.

HOW IT WORKS

1. Open Custom Domain.
2. Enter the domain and branding.
3. Follow the steps to point the domain.

HOW IT CONNECTS TO OTHER MODULES

- **Company Profile:** branding is shared.
- **Signing in:** the branded login is the visible result.

SALES AND DEMO TIP

Beta today, and it is a premium and partner feature. Great for a reseller or enterprise conversation.

46

Settings CORE

Roles, permissions, defaults and preferences in one place.

Who uses it: Everyone

The screenshot displays the ZeniaHR Admin Panel's Settings interface. On the left, a dark sidebar contains a navigation menu with items like Dashboard, Employees, Employee Cards, Attendance, and more. The main content area is titled 'Settings' and features a 'Policy & Settings Hub' with tabs for Statutory Payroll Rules, Manage Departments, User Roles & Permissions, Labour Compliance, and Bank Verification Gateways. The 'Enterprise Payroll Rules & Compliance Engine' section is active, showing a 'Payroll Component Builder' where users can create and manage payroll components. A table with columns for Component, Type, Category, Formula / Calc, Taxable, Status, Effective From, and Action is shown, but it is currently empty with a message: 'No components found. Click "Add Component" to create your first one.'

The control panel for a company: user roles and the permission matrix, billing defaults, payroll and leave defaults, and personal preferences. This is where a Company Head decides who can see and do what.

KEY FEATURES AND OPTIONS

- User roles and the permission matrix.
- Company defaults for payroll, leave and billing.
- Personal and display preferences.

HOW IT WORKS

1. Open Settings.
2. Set roles and permissions.
3. Adjust defaults and save.

HOW IT CONNECTS TO OTHER MODULES

- **User Management:** the same permission model governs access.
- **All modules:** defaults set here shape behaviour everywhere.

SALES AND DEMO TIP

When a customer asks can I control who sees salaries, open Settings and show the permission matrix.

ZeniaHR product and sales guide. Screenshots captured from a demo workspace (ZeniaHR Demo Enterprise) for training use. Figures shown are sample data. Modules marked Beta are still under active development.
